Projects	
Project Name	SocialU
Description	Made a social platform using MERN stack where the users can register themselves as and make a profile for themselves, and can interact with other like-minded people. The users can specify their education details, experience details and can also comment on other user profiles, portfolio details etc. The backend was made using NodeJS and ExpressJS with MongoDB as the database.
Technologies Used	MERN stack
Project Link	<a href="https://github.com/prateek951/SocialU">https://github.com/prateek951/SocialU</a>

Project Name	E-commerce Store
Description	Made an e-commerce store application using React.js as the frontend and GraphQL Nodejs Backend in which a user can login into the application and can sell their stuff, buy items by other sellers and checkout. The user can order products and checkout. Pagination has also been implemented along with filtering of products based on their names.
Technologies Used	React.js, GraphQL
Project Link	<a href="https://bit.ly/2UnHnuY">https://bit.ly/2UnHnuY</a>

Most of my other projects can be seen on my GitHub Repository
